**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/22/03 has been entered.

***Claim Rejections - 35 USC § 102***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 71,72,82 and 83 are rejected under 35 U.S.C. 102(b) as being anticipated by Sawaki et al made of record.

These claims stand rejected as discussed in the previous office action, with Sawaki showing in fig. 8 a diffractive element including effective(51c, etc.) and peripheral(33c, etc.) light-shielding areas comprising Cr/Cr oxide surrounding the effective area. Note also the top-down view of fig. 7 which shows the light shielding areas to surround the effective areas.

***Claim Rejections - 35 USC § 103***

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 73-81,84 and 85 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sawaki et al.

The limitations of these claims are either met by or obvious over Sawaki as discussed in the previous office action.

***Response to Arguments***

Applicant's arguments submitted with the amendment are not persuasive.

Applicant has argued that Sawaki, while possibly showing a light shielding member in conjunction with diffraction gratings, teaches the diffractive elements to be inserted into light shield 33c and thus does not teach a diffractive element with effective and surrounding light-shielding peripheral areas.

However, this assessment of Sawaki is seen to be incorrect. Sawaki teaches that the diffractive elements are patterns which are formed onto a substrate. A light shielding layer or member is applied to the areas surrounding the diffractive (or effective) portions. Note Sawaki fig. 7 and the discussion in col. 6 lines 38-64 for this teaching. Thus, Sawaki's diffractive elements are not inserted into a light shield.

Art Unit: 2872

Accordingly, Sawaki is seen to satisfy the claimed requirements of a light-shielding peripheral area which surrounds the diffractive element effective area.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Robinson whose telephone number is (703) 305-3506.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cassandra Spyrou can be reached at (703) 308-1687. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
